📍 Ernakulam

### BCA

Nirmala College, Muvattupuzha 2020-2023

📍 muvattupuzha

## PROJECTS

### E-Commerce Full Stack Application

git repo: <https://github.com/Nayana333/ZoneApple>

📍 zoneApple.online

E-Commerce full stack application

- Developed a feature-rich e-commerce platform with secure authentication, Razorpay for payments, efficient order management, image cropping, dynamic sales visualization, and user-friendly admin tools.
- Used Node.js, Express.js, EJS, Javascript, MongoDB, Git, and NGINX

### Orphanage Management System

git repo : <https://github.com/Nayana333/Aquene-python>

📍 Godāwari, Nepal

Orphanage Management System

- Created a user-friendly management system simplifying resident, donor, staff, and inventory management with authentication, admin panel, and special module for trust-related activities.
- Used Python, Django, HTML, CSS, MySQL, Git

### Dynamic Web Solution

git repo : <https://github.com/Nayana333/redux-project>

Goal setting app

- Dynamic web solution with React, Redux, and Node.js, featuring JWT authentication, MongoDB for data storage, CSS for styling, and CRUD functionalities.

### OLX Clone

OLX - Clone

- Developed OLX clone using React.js and Firebase for efficient product management and user authentication.

### Library Management System

Library Management System

- Built a web application for library management with PHP, HTML, CSS, and MySQL, featuring CRUD operations and modules for different users.
